Title Index to Volume 13

Alternatives to vaginal intercourse practised during the fertile time among calendar method users in Ireland 173
Analysis of pre-ovulatory changes in cervical mucus hydration and sperm penetrability 143
Approaches for incorporating ovulation detection devices and home kits into learning NFP – implications for service delivery 269
The behavior of Italian family physicians regarding the health problems of women and, in particular, family planning (both contraception and NFP) 283
The benefits and barriers associated with a national natural family planning service: the New Zealand experience 295
Body/self awareness and interpersonal communications: fundamental components of reproductive health awareness 319
Breaking the mold. Expanding options for reproductive health awareness: the CARE experience 355
Changing behavior: A challenge for reproductive health awareness 351
Comparing a public and private sector NFP program: implications for NFP expansion 255
A comparison of the clinical performance, contraceptive efficacy, reversibility and acceptability of Norplant implants and Ortho Gynae T 380 intrauterine copper contraceptive device 385
Contraceptive efficacy of norethindrone encapsulated in injectable biodegradable poly-*dl*-lactide-co-glycolide microspheres (NET-90): phase III clinical study 1
Current status of injectable hormonal contraception with special reference to the monthly method 405
Effects of low steroid doses administered in the mid and late follicular phase of the LH surge, ovarian steroids and follicular maturation in eumenorrheic women 39
Effects of timing of conception on birth weight and preterm delivery in natural family planning users 215
Expanding the availability and improving delivery of natural family planning services and fertility awareness education: providers' perspectives 275
Factors associated with unintended pregnancy 429
Factors to address when periodic abstinence is offered by multi-method family planning programs 261
Fraction of blood lipids, its side-effects and continuation of Norplant use 13
The frequency and spectrum of congenital anomalies in natural family planning users in South America: no increase in a case–control study 395
Gender, sexuality and communication issues that constitute barriers to the use of natural family planning and fertility awareness methods 303
Incidence and implications of altered semen quality on family planning 123
Intrauterine device and pelvic inflammatory disease 71
Is male reproductive health at risk? Longitudinal semen analysis studies 119
Issues to consider in operationalizing reproductive health 345
Main-streaming NFP into the Department of Health of the Philippines: opportunities and challenges 249

Midtrimester termination of complicated pregnancy with oral misoprostol 55
Model-based approaches to studying fertility and contraceptive efficacy 97
Modulation of uterine artery resistance to blood flow by the oral contraceptive pill 47
Monitoring reproductive hormones to detect the fertile period: development of Persona – the first home use system 139
Natural family planning effectiveness: evaluating published reports 155
Natural family planning in New Zealand: a study of continuation rates and characteristics of users 191
Natural family planning with and without barrier method use in the fertile phase: efficacy in relation to sexual behavior – A German prospective long-term study 179
Operationalizing reproductive health awareness 363
Oral contraceptives and breast cancer risk 63
The potential contribution of sexuality and gender awareness to reproductive health 325
Prediction and detection of the fertile phase of the menstrual cycle: an overview 131
Pregnancy complications in natural family planning users 229
Pregnancy outcome in natural family planning users: cohort and case–control studies evaluating safety 201
The probability of conception on different days of the cycle with respect to ovulation: an overview 83
Probability of conception on different days of the menstrual cycle: an ongoing exercise 105
The reproductive health awareness (RHA) model: a qualitative perspective 339
Reproductive health awareness: An important dimension to be integrated into existing sexual and reproductive health programs 331
Reproductive health awareness: an integrated approach to obtaining a high quality of health 313
Requirements for NFP service delivery: an overview 241
Safety, functionality and acceptability of a prototype polyurethane condom 439
Simplifing NFP: Preliminary report of a pilot study of the 'collar' method in Brazil 167
Treatment of bleeding problems associated with progestin-only contraceptives: survey results 419
